

## Preparing for your MRI Enterography Exam w & w/o contrast

- ✓ Nothing by mouth for four (4) hours prior to your **ARRIVAL** time
- ✓ When you arrive, you will be given two bottles of oral contrast to drink prior to your scan
- ✓ You will be given two tablets of medication called Levsin just before getting on the MRI scanner which will help slow down the movement of your stomach for a short period of time
- ✓ An IV will be placed for the contrast dye
- ✓ Plan to be here for approximately two hours from start to finish
- ✓ If you are anxious and/or claustrophobic, please make arrangements with your doctor for medication, and arrange for a family member or friend to drive you home after the exam
